PROFESSIONAL PROFILE

Software Development student from Gaza with a Computer Engineering foundation and practical experience building responsive websites, landing pages, dashboards, and digital-service prototypes. Combines technical learning with field coordination and media/documentation experience in humanitarian environments, which strengthens communication, problem-solving, and delivery under pressure.

CORE VALUE

- Builds clean, mobile-first web interfaces with clear user flows and bilingual Arabic/English support.
- Transforms ideas into structured landing pages, portfolio websites, business websites, and service platforms.
- Understands practical delivery: requirements, content structure, conversion paths, performance, and maintainable code.
- Brings crisis-tested teamwork, field communication, and community-oriented thinking into digital product work.

TECHNICAL SKILLS

Frontend	HTML, CSS, JavaScript, responsive layouts, RTL/LTR support, accessibility basics, clean component structure
Programming	Python fundamentals, Java fundamentals, SQL basics, data structures/coursework foundation
Web Product Delivery	Landing pages, portfolio websites, business websites, dashboards, case-study presentation, WhatsApp conversion flows
Automation & Integrations	AI-assisted workflows, API thinking, Telegram bot concepts, automation prototypes, backend-aware implementation
Quality & Deployment	SEO basics, performance optimization, image optimization, Git/GitHub workflow, security-conscious frontend practices

SELECTED PORTFOLIO PROJECTS

KLIK Store - E-commerce Services Platform

- Structured a service-based online store experience with clear cards, responsive sections, and WhatsApp-oriented conversion paths for client inquiries.

LedgerQ - Offline QR Ledger Concept

- Designed a low-resource digital ledger concept for street vendors, including QR identity, local-first debt/sales records, installment tracking, and simple customer confirmation flows.

ReliefTrack / Najda - Emergency & Humanitarian App Concept

- Developed a social-impact product concept for crisis conditions, including danger-zone awareness, distress signaling, alerts, and first-aid guidance logic.

SIMLink - Digital SIM Services Landing Page

- Built a modern landing page structure for SIM-related digital services with clear service hierarchy, feature sections, and mobile-first presentation.

ForgeX Gym - Fitness Landing Page

- Created a conversion-focused gym landing page with hero positioning, schedules, services, and direct action sections.

EDUCATION

Islamic University of Gaza - BSc Software Development / Computer Engineering Coursework Background

Gaza, Palestine | Approx. 84 credit hours completed | Academic standing: Very Good / approx. 80%

Relevant coursework and learning exposure include programming, Java, Python, databases, data structures, digital logic, circuits, physics, calculus, and practical web development.

Masqat Rafah Secondary Boys School A - Scientific Stream

Rafah, Gaza Strip | Final average: 84.9% | Graduation year: 2022

FIELD & COMMUNITY EXPERIENCE

Saed for Human Development - Field Media Representative & Field Project Coordinator

Gaza, Palestine | Volunteer / project-based

- Supported field media documentation, community outreach, and coordination with beneficiaries and field teams.
- Helped organize and communicate humanitarian service activities under unstable conditions and limited resources.
- Prepared clearer field narratives and beneficiary-facing communication for community projects.

Rahma Worldwide - Aid Distribution Coordinator

Gaza, Palestine | Volunteer / community support

- Contributed to aid distribution coordination and beneficiary communication during emergency-response activities.
- Supported practical logistics, team coordination, and organized delivery of community assistance.

Running Aid Team - Community Support Volunteer

Gaza, Palestine | Volunteer

- Participated in local relief activities including bread, water, meals, and aid-related support for affected families.
- Strengthened field teamwork, reliability, public communication, and service-oriented execution.

TRAINING & CERTIFICATIONS

- EF SET English Certificate - C2 Advanced proficiency.
- IT Foundations: Programming with Python - Gaza Sky Geeks / Mercy Corps.
- Web Design and Front-End Development - Kuwait Professional Center.
- IELTS Preparation Course - Islamic University of Gaza, Community Service and Continuing Education Deanship.
- Entrepreneurship Enhancement - Youth Innovation Incubator / Youth Without Borders Foundation.

LANGUAGES

Arabic	Native
English	Advanced / C2-supported English proficiency; comfortable with technical learning and professional communication.

WORKING STYLE

- Requirements-first: clarifies project type, target users, pages/sections, timeline, assets, and success goal before implementation.
- Delivery-focused: builds practical outputs that can be tested, shared, maintained, and improved.
- Security-conscious: avoids exposing secrets in frontend code and prefers clean file structure, safe links, and controlled integrations.
